BOOK SYNOPSIS

This companion study guide to *Advanced Pediatric Assessment*—incorporates case studies, certification-style review questions, and anatomic labeling exercises to enhance and reinforce the specialized learning experience of PNP and FNP students. This study guide is the only one to focus specifically on the assessment of infants and children. Its chapters align with corresponding textbook chapters to facilitate exam success and mastery of skills required to expertly conduct the pediatric history and physical examination. Case studies reflecting the format used in the exam and certification-style review questions help students to foster critical thinking as it relates to pediatric patients.
